

JOB DESCRIPTION

POSITION TITLE	: Postdoctoral Fellow
DEPARTMENT	: Computer and Information Sciences
LOCATION	: Universiti Teknologi PETRONAS
REPORTING TO	: Head- Mission Oriented Research :Megacity
SUPERVISE	: Postgraduate

ACCOUNTABILITY OBJECTIVES

The Megacity Mission Oriented Research is one of the research areas which focus in computer-aided diagnosis and medical imaging informatics. The research will involve development of digital image processing, computer vision, image analysis methods and software for detection and analysis of abnormalities on medical images such as mammograms, computed tomograms, tomosynthesis images, MR and ultrasound images.

JOB DIMENSION

The candidate shall possess the following qualification and criteria as follows:

- a PhD degree in computer science, electrical or biomedical engineering, or medical physics
- training or work experience in medical imaging, digital image processing, computer vision, pattern recognition, artificial intelligence, neural networks, machine learning, and statistics
- hands-on experiences in software design and implementation in C/C++/Java/Matlab environments.
- strong communication skills, and ability to work independently and with an interdisciplinary team.

JOB DESCRIPTION

PRINCIPAL ACCOUNTABILITIES

1. To support the Mission Oriented Research head in planning, developing, organizing, implementing, directing and evaluating the operational performance
2. To plan schedule, supervise, coordinate the arrangements of the allocation of subordinates work load, schedule and activities
3. To introduce new ideas, methods and design of product according to market requirements.
4. To execute in the process of tender and contract as well as procuring and evaluating of consumable asset and consumables. (OPEX)
5. To assist in the process of purchasing of fixed asset.(CAPEX)
6. To arrange, and coordinate all public relation and image building matters related to the Center.
7. To support the HSE department in implementing the HSE MS.
8. To enforce compliance at all times with UTP laboratory Safety Policies and UTP laboratory Rules And Regulation.
9. To lodge, compile report and present to the relevant authority in the University any defects in which it may affect safety in labs and facilities.
10. To enforce safe keeping of information obtained in the course of duties performed and to refrain from disclosing information without the consent of Universiti Teknologi PETRONAS, except by court order.
11. Proactively involve in the implementation and maintenance of corporate wide quality culture process (QCP), and health, safety and environment (HSE).
12. Perform other duties as and when requested by superiors.

JOB DESCRIPTION

MAN – SPECIFICATIONS

1. Education:

PhD in Computer Science/Image Processing/Pattern recognition/electrical/biomedical engineering/medical physics with 2 years working experience at organization related to the relevant areas.

2. Professional Working Experience:

Minimum of two years and well verse in latest technology prototyping and program design.

3. Specific Skills and Knowledge:

Any of the following qualifications will be an advantage:

- Knowledge and experience in medical imaging.
- Experience in development of graphics software and user interface.
- Experience in development of software in a group environment.

Candidates who possess a strong motivation to pursue academic research are encouraged to apply. The candidate should have sound scientific record in the area of image processing and analysis. Advanced knowledge of Matlab, good communication, interpersonal and presentation skills are required. In addition, the candidate should be a team player who is capable of working together with experimentalists and other computer science field.

COMPETENCIES

1. Leadership – able to lead and guide team members under his/her custodian to complete any given tasks/ assignments.
2. Supervisory skills – able to supervise subordinates.
3. Communication skills – able to communicate well at all levels and can deliver message accurately.
4. Planning and Coordination – able to plan and coordinate sequence of work to timely and satisfactory complete any tasks/ assignments.

JOB DESCRIPTION

5. Negotiation skill – able to convince other parties to offer win-win business transaction for both parties.
6. Time Management – able to manage time to suit unexpected events/ tasks and able to prioritize works based on importance and urgency.
7. Motivation – able to stimulate and energize oneself and team members under his/her custodian when facing with difficulties in completing any assignment.
8. Report writing – able to write report/ proposal with tact, accuracy and concise without deviating from its objectives.
9. Assertive – able to exercise assertiveness without attending others.
10. Business Acumen – poses business minded and entrepreneurship thinking that enhances the University vision and mission.
11. Team Work – able to nurture and maintain team work and spirit amongst team member in completing any assignment.
12. Interpersonal relation skills – able to maintain and nurture relationship rapport with internal and external parties.

MAJOR CHALLENGES

1. To ensure the establishment of guidelines and procedures for the Center are implemented accordingly.
2. To maintain and update knowledge on laboratory and engineering technologies.
3. To ensure proper documentation procedures.
4. To meet day-to-day requirement on office administration.
