Born on 20 December 1925 in Kampung Seberang Perak, Alor Setar, Tun Dr Mahathir bin Mohamad started school at Sekolah Melayu Seberang Perak in 1930. He was there for two years, before continuing his education at the Government English School (now known as the Sultan Abdul Hamid College) in Alor Setar. During the Japanese Occupation from 1941 to 1945, he stopped school. After the Japanese surrendered, Tun Mahathir resumed his education and received the Senior Cambridge Certificate in the same year.

Upon completing his secondary education in 1947, Tun Mahathir received a partial scholarship from the Government to study medicine at the King Edward VII Medical College – the forerunner of the University of Malaya – in Singapore. In 1953, Tun received his MBBS degree from the University of Malaya and immediately began housemanship in Penang. July 1981, Mahathir became the fourth Prime Minister of Malaysia, a position he held for 22 years. He retired on 31 October 2003.

Under the stewardship of Tun, Malaysia has witnessed unprecedented economic growth especially in manufacturing, infrastructure, information technology and oil and gas.

In recognition of his outstanding contributions to nation building, Tun received numerous prestigious fellowships, awards and honours from universities and academic institutions, both locally and internationally, Honorary Member, Academy of Medicine (1983), Honorary Member, Malaysian Medical Association (1984), Honorary Fellowship of the Royal College of Surgeons, Ireland (1991), Honorary Fellowship, Academy of Sciences Malaysia (1996), Honorary Fellowship, Royal College of Physicians of Edinburgh (1997), Honorary Professor, Kyrgyz University (1996), Honorary Doctorate in Humanities, National University of Mongolia (1997), and Honorary Doctorate of Literature, and Al-Azhar University (1998), to name a few.

In 2001, in recognition of his dedication to promoting human resource development in Malaysia through educational and technological exchange with global perspective, Tun was awarded the Honorary Doctorate by Meiji University, one of the prestigious universities in Japan. After his retirement, he continued to receive various honours. These include an Honorary Doctorate in the field of management and engineering from Universiti Teknologi Malaysia (2003), and the Honorary Degree of the Doctor of Letters, Universiti Islam Antarabangsa (2003) for his distinguished contributions as a Muslim writer and an outstanding intellectual.

After 3 years with HR, she spent another 3 years with the Petrochemical Business but this time marketing and trading of Petrochemical products. From the selling of petrochemical products, she had the opportunity to "sell" classical music concerts when she headed the Malaysian Philharmonic Orchestra for 3 years as the CEO.

Juniwati is also very active in sports and was a competitive swimmer and tennis player in her student days. She was appointed to ITPSB Board on 2 March 2009.

The University has taken another step to ensure that its education deliveries remain relevant with industrial practices. In order to further strengthen its relationship with industry players, Industry Advisory Panel (IAP) was established and held its inaugural meeting on 7 May 2007. The University invited twenty-four panel members consisting senior practitioners from the industry, all with vast experience and expertise in their respective fields, to assist in planning and continuously improving the quality of the programmes offered in UTP. Industrial input from panel members help the University to further enhance its curriculum, and to establish academic-industry collaboration. Panel members are required to meet the heads of departments at least once a year to discuss the University's academic curriculum, teaching methodology, facilities and practices to help it stay in tune with the emerging needs of the industry.

The Report

Chairman's Review

“Throughout 2008/2009 Universiti Teknologi PETRONAS has chartered several milestones; from collaborations and partnerships to winning accolades and recognition at the international arena with our research and our students' outstanding performance.”

Throughout 2008/2009 Universiti Teknologi PETRONAS has chartered several milestones; from collaborations and partnerships to winning accolades and recognition at the international arena with our research and our students' outstanding performance. Our high quality of undergraduate education and innovative research environment has been validated by external reviews and endorsement. The overall standard of our teaching and research was independently assessed as excellent by our External Examiners, Industry Advisory Panel and Academic Advisory Council. This is further testified by the high marketability percentage of our graduates and the accreditation received by local and international authorities. We have had 10 successful years.

Moving forward, we have launched a Transformation Plan to guide our development in the years ahead to achieve our goal of becoming a quality research University within the next 10 years. Our strategy is to firmly consolidate our position to achieve our vision of being an acknowledged leader in technology education and a centre for creativity and innovation. It is central to our philosophy that anyone with outstanding talents should be encouraged to contribute and benefit from the University's progress. We are committed to nurturing young talents and unleashing their full potential to become leaders in their respective profession and community.

Over the next five years the Board will continue UTP's expansion programme with investments in buildings, facilities and staff development to strengthen the University's competitive edge. With dedicated academic and support staff, UTP will continue to be at the forefront of higher learning institutions.

The Board has been diligent in ensuring corporate governance is adhered to and the University practices sound financial management.

I would like to thank all Board members for their contribution, unfailing commitment and dedication. Our heartfelt appreciation to our University Chancellor, YABhg Tun Dr Mahathir bin Mohamed for his advice and guidance. His tenacity, zest and wisdom have inspired and motivated, not only the graduates, but faculty members and staff alike. Our special thanks to YBhg Tan Sri (Dr) Mohd Hassan Marican, President and CEO of PETRONAS for his unwavering support of UTP. The success we have achieved thus far is a collective effort from all levels – the University Chancellor and Pro-Chancellor, Board, Academic faculty members and staff under the able stewardship of our Rector YBhg Datuk Dr Zainal Abidin Hj Kasim.

We will continue to support and play our role in meeting the aspirations of the nation and in complementing PETRONAS' and Malaysia's effort towards becoming a developed nation by 2020.

Until next year.

Datuk Ainon Marziah Wahi

Chairman

Rector's Report

The Financial Year 2008/09 was another successful year for Universiti Teknologi PETRONAS despite a challenging business environment. Against the backdrop of a recovering yet volatile global economy amidst geopolitical uncertainties the University recognises that continued success is very much reliant on the quality and competency of its most valuable assets – its human capital. The University remains committed to the ongoing development and enrichment of its faculty, staff members and students.

Recollecting on what we have done would set the climate and the track in putting our efforts together in moving ahead. It would also provide the opportunity to consolidate, realign and redesign our thinking and resources to ensure this University continues to be the preferred institution and partner of choice. If we look at the world scenario currently, business is not running as usual. I am sure Malaysia, PETRONAS or the University is not spared. The impact is a matter of degree. But the University has yet again proven to be strong and resilient. It acted proactively and strategised well in anticipation of events, instead of merely responding. The University has recently embarked on a transformation plan with the core objectives to develop structured and calculated action plans to facilitate the University's journey to achieve a world class Research University; revisit and expand the selection of research areas and benchmark existing and future R&D areas and road maps; and collect data for planning purposes especially with regards to the five R&D mission-oriented research fields.

The University is well prepared to face the challenges, armed with its faculty strength of 312, as at 31 March 2009. Out of the total, 47% comprised PhD lecturers and 2 sponsored Professorial chairs. There are a total of 16 professors and 66 Associate Professors to cater to the needs and requirements of a population of 6377 students, at foundation, undergraduate and postgraduate levels.

“The Financial Year 2008/09 was another successful year for Universiti Teknologi PETRONAS despite a challenging business environment.”

International Students by Country

An international student community from more than 30 countries. Increasing numbers of international students contribute to the globalisation of UTP campus community.

Student	No
Postgraduate	443
Undergraduate	403
Foundation	131
Total	977
No of countries :	33

Out of the number, 33.6% is research-active lecturers who shoulder the responsibilities of producing quality publications like citation-indexed journals and refereed proceedings as well as undertaking mission-oriented researches and exploring potential of creating innovation via patents and commercialisation of research products. As at 31 March 2009, the University has produced 62 citation-indexed journals and won a total of 9 gold awards, 17 silvers and 12 bronzes at prestigious national and international expositions specifically in ITEX (Malaysia), MTE (local), INPEX (USA), IENA (Germany), INNOVA (Belgium) and SIIF (Korea).

It is also our duty and our role to proactively act in tandem to ensure our parent company, PETRONAS continues to progress well to become a global champion. The University, in its scorecard list outlined five important roles in supporting PETRONAS' business specifically and the nation's well-being generally;

- Contribute towards sustaining a steady pipeline of talent for PETRONAS and the nation by delivering relevant and quality graduates. In March 2009, the employability rate rose to 85% from 80%;
- Enable the institutionalisation of capability and capacity building. As at 31 March 2009, 33.6% of the academic staff of the University was involved as principal investigators for research. In addition, the University received RM15 million research grants to propel its research and development endeavours;
- Contribute towards technology development, knowledge creation and knowledge management. As at 31 March 2009, the University recorded a total number of 62 publications in citation-indexed journals including refereed proceedings; produced 8 PhD graduates, and conducted 17 technical programmes for PETRONAS' capability development;
- Contribute towards PETRONAS brand and business positioning. A total number of 38 joint academic and research programmes in the form of staff exchange, staff attachment, visiting professorship, professorial chairs, and student study abroad and exchange programmes had been undertaken in collaboration with local and international institutions;
- Ensure operational excellence and enhance triple plus elements. These were achieved by maintaining cost per student at RM27k which excluded depreciation.

The current economic slowdown did not dampen our commitment. Instead it merely fuelled our resolve to explore new opportunities and potential. In fact this slowdown was perhaps a blessing in disguise. We were able to attract people from all over the world including postgraduate students to explore various academic endeavours at the University.

I am also proud to share highlights of the events that took place in the year under review:

Academic Overview

This year, the University introduced three (3) new postgraduate programmes, namely MSc in Asset Management, MSc in Advance Process Control, MSc in Electronic System Engineering and one (1) new degree programme – Bachelor of Technology (Honours) Petroleum Geoscience. We remain consistent in our commitment to ensure that our academic programmes are industry relevant.

In its continuous efforts to enhance its programme offering as well as its research and development, the University's Academic Advisory Council chaired by YABhg Tun Dr Mahathir bin Mohamad met at their sixth meeting on Tuesday, 8 July 2008. The Council amongst others discussed matters relating to the strategic development of the University including its R&D efforts and international linkages. The Council also acted as a forum for the exchange of ideas between academics and industry practitioners, whilst providing guidance and strategic direction on the development of the University.

The University was also active in organising conferences that convened participants from the learning institutions and industry. Three notable conference held this year were the International Conference on Plant Equipment and Reliability (ICPER 2008), the International Conference on Construction and Building Technology 2008 (ICCBT 2008) and the Regional Conference on Humanities which were held in March and June 2008 and February 2009 respectively.

The inaugural International Conference on Plant Equipment and Reliability (ICPER 2008) was held on 27 and 28 March 2008. Themed 'Engaging Research and Technology to Enhance Plant Performance', the conference saw 95 papers presented on various aspects of plant operations aimed at enhancing the performance and improving operations thus reducing costs in plant operations.

The International Conference on Construction and Building Technology 2008 (ICCBT 2008) held on 16 – 20 June 2008 was co-organised by Universiti Tenaga Nasional (UNITEN), International Association for Concrete Technology (IACT) and Universiti Teknologi PETRONAS. The conference played host to about 200 presenters and participants from various institutions and 36 other countries, most notably USA, United Arab Emirates, United Kingdom, Australia, Taiwan, Japan, The Netherlands and Canada. ICCBT is part of a series of conferences organised by IACT. The earlier seven meetings were held in Jordan (1983), Libya (1986, 1993), Cyprus (1996), India (1999), Jordan (2002) and Malaysia (2004). The conference saw 250 papers presented in six parallel sessions with topics that served effectively as a platform for university researchers and industry practitioners to exchange ideas and learn about the recent findings and the latest research that can be applied in operations.

The Regional Conference on Humanities with the theme 'The Humanities in Driving Leadership and Building Capabilities in Asean' was organised on 18 –19 February 2009. This conference provided a platform to discuss issues and challenges in the aspects of humanities toward ASEAN's regional community building. It also succeeded in synergising efforts from the higher learning institutions and industry on the value of humanities towards leadership and capability building.

The University also throbbed with energy with various series of Public Lectures. One of the series depicted an annual session with the University's very own Chancellor, YABhg Tun Dr Mahathir Mohamad sharing his experience, views and knowledge with the staff, students and the public. This year YBhg Tun spoke on 'National Identity and Power Sharing'. In the same series, a Special Lecture by His Royal Highness The Regent of Perak, Raja Dr Nazrin Shah, was held on 5 May 2008 with the title 'The Challenges Of Human Capital Development'.

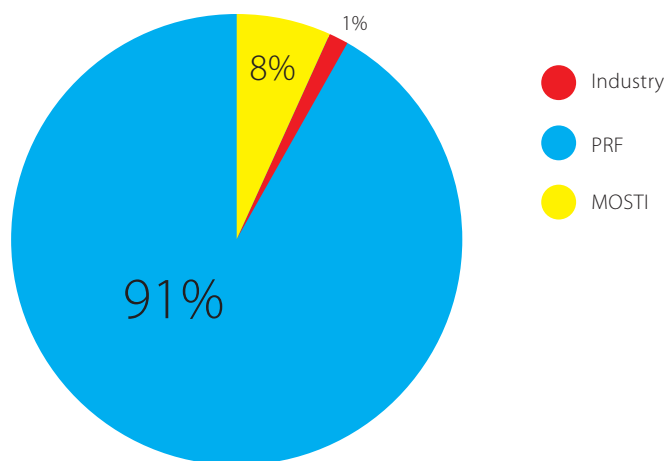

In its pursuance to globalise its academic offerings at the University, this year the signing of a Memorandum of Understanding (MoU) between the University and Graz University Of Technology (GUT), Austria on 17 January 2008 marked another important milestone in its quest to attain academic and R&D excellence graced by the Austrian Ambassador to Malaysia, H.E. Ambassador Dr Donatus Köck. The formalisation of alliance between these two leading institutions of higher learning has paved the way for further meaningful collaboration in staff development programme; undergraduate and postgraduate student exchange; joint research and development activities; and joint academic and scientific activities. Through this collaboration, both parties would also be able to embark on joint R&D work together with PETRONAS and BRP Rotax, one of the international leaders in the manufacturing of recreational vehicles and small aircraft engines.

R&D Activities

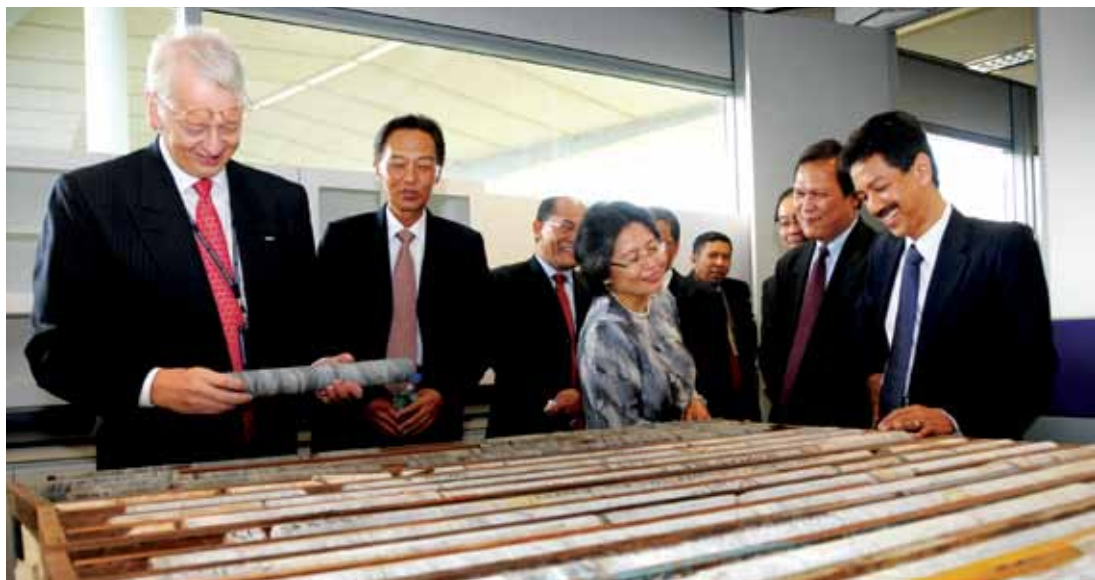

The University is a firm believer in pillaring its research and development endeavours that would contribute to the betterment of society. As at the year ending 31 March 2009, the University has received a total of RM42.2 million from Petroleum Research Fund (PRF), RM3.7 million from MOSTI, and RM0.23 million from the industry which brought the total research and development incentives to a resounding RM46.2 million. The cumulative external funding received since the University launched its research and development masterplan in the year 2002 until 31 March 2009 is RM105.1 million.

Source of Research Funding

Research Funding 1/4/2008 – 31/3/2009

On 15 May 2008 the University was successful in developing a monitoring system for diabetic patients, a project spearheaded and anchored by Professor Ir Dr Ahmad Fadzil Mohamad Hani. In the past few years, the University's Intelligent Signal & Imaging Research Cluster has carved a niche in medical image analysis. They won several awards locally and internationally whilst producing a vast number of academic publications internationally covering both fundamental and applied research in areas of medical imaging to seismic processing for oil and gas. On 15 May 2008, this research cluster led by Professor Ir Dr Ahmad Fadzil Mohamad Hani celebrated yet another achievement – The Unveiling of the Computerised Diabetic Retinopathy Monitoring and Grading Prototype System. This prototype system was developed under the Ministry of Science, Technology and Innovation (MOSTI) Technofund grant awarded to Professor Ir Dr Ahmad Fadzil in 2006. MOSTI Technofund grants are designed to assist the R&D community to take research outputs to the next stage of development for field trials or clinical trials prior to commercialisation efforts. The prototype system could screen patients of diabetes for an early diabetic retinopathy – a disease that can lead to blindness if not treated. In the next stage of the development, the prototype will be used in clinical trials at the Ophthalmology Department of Hospital Selayang, Selangor, before commercialisation.

In cementing its commitment to prospering research and development activities the University launched two research and development facilities in this financial year.

On 10 July 2008, the Civil Engineering Department of Universiti Teknologi PETRONAS was very proud to announce the opening of the offshore labs. It is hoped that the lab facilities would achieve groundbreaking research and new breakthrough in the area of offshore engineering. The 22 meters long by 10 meters wide and 1.5 meter deep wave tank is capable to generate many types of waves with state of the art capability to observe and measure the effect of wave on structures like jetty, seawall, revetment and pontoons and have immeasurable benefits to research and development.

A new research and teaching centre dedicated to carbonate studies – the South-East Asia Carbonate Research Laboratory (SEACARL), was officially launched on 20 March 2009. The centre was founded by Professor Dr Bernard J.M. Pierson, Shell Chair in Petroleum Geosciences at the University. The launch marked another important milestone for the strategic collaboration established between UTP and Shell, which was first instituted with the signing of a Memorandum of Understanding in 2006 between the two parties. Such collaboration had enabled both institutions to focus on research projects dedicated to the oil industry in Malaysia; to form the best possible carbonate experts in South-East Asia through a series of high-quality specialised courses on carbonate sedimentology, stratigraphy, petrography, seismic and log response which will be offered at UTP and PETRONAS. The courses will complement the Geosciences and Petroleum Engineering programmes at UTP.

Another academic collaboration in the area of research and development entered by the University was with Transocean. The signing of a Memorandum of Understanding (MoU) between the University and Transocean, a leading company in providing offshore drilling services particularly in deepwater will enable the University to accelerate its capability in the deepwater technology which is one of the main focus areas of the University's R&D. The establishment of a Drilling Technology Chair will provide the critical link required to ensure the success of the collaboration. Apart from the establishment of the Chair, Transocean will also assist the University by providing expertise to support UTP academic delivery through the adjunct lecturer programme and industrial placements for the students and staff.

The University's research and development continued to create waves with the collaboration established with Group Technology Solutions (GTS) of Research & Technology Division PETRONAS on 11 November 2008. The collaboration is hoped to capitalise on PETRONAS' experience in the oil and gas industry, leverage on the University's experience in R&D & Technology Development, pave the way for the industries and University to work together to accelerate technology development as a catalyst for supporting PETRONAS Technology Agenda and instill innovation traits within PETRONAS and UTP, as a step towards inculcating a sustainable innovation culture.

The University proved its mettle when it emerged as the best among 13 Malaysian universities, by winning 5 golds, 3 silvers and 1 bronze in the '24th Invention & New Product Exposition 2008 (INPEX 2008)' held in Pittsburgh, USA from 11–14 June 2008 based on 6 products submitted. Malaysia sent the largest delegation apart from the USA to the exhibition. The exposition attracted participation of more than 300 research products from 14 different countries amongst others USA, Germany, Russia, France, China and Taiwan and provided the needed leverage, exposure and opportunity for the University's faculty to expand their frontiers especially where new knowledge, research and development are concerned.

The University also through its research products marked yet another international triumph by winning a total of 3 gold and 1 silver medals in the INNOVA EUREKA EXHIBITION through its 4 research projects. The exhibition held in Brussels, Belgium from 13–15 November 2008 attracts more than 600 inventions from more than 30 countries every year. The competition was the University's second participation alongside six other Malaysian universities and research institutions. This year, the University scored the highest percentage of gold awards (75%) as compared to other Malaysian participants.

Students Achievements and Activities

Receiving external recognition is indeed the highest form of endorsement of the students of the University. The Tunku Award held on 5 February 2008 recognised students' excellence in academic, co-curriculum activities and leadership. UTP's Mohd Fairuz bin Azman, the recipient, graduated in August 2007 with a Bachelor of Engineering, Mechanical Engineering. He obtained a First Class Honours Degree and was also the recipient of the Gold Chancellor Award during the Seventh Convocation ceremony.

Our students continued to make us proud with their achievements when they emerged champion in "Pertandingan Debat Kemerdekaan Ala Parlimen Antara Universiti-universiti Malaysia 2008," organised by Arkib Negara Malaysia in collaboration with Majlis Debat Universiti-Universiti Malaysia (MADUM), on 23 to 25 August 2008. Not only did our students prove their oratorical prowess in the Bahasa Malaysia language, but our Mandarin Debate Team also strode elegantly and proved their worth by securing the Runner Up placing in the National Varsity Chinese Debating Competition 2008. It was a double victory when one of our debaters, Lee Kok Hock was announced as the Best Speaker in the finals.

On 24 June 2008, Student in Free Enterprise Universiti Teknologi PETRONAS (SIFE UTP) was awarded the SIFE SPIRIT AWARD for SIFE National Competition 2008. The SIFE National competition 2008 was organised by SIFE MALAYSIA to select the best SIFE Team to represent Malaysia at the SIFE WORLD CUP 2008 in Singapore from 1–3 October 2008. SIFE is an international non-government organisation that is active in over 1800 colleges and universities in more than 40 countries. It mobilises teams of university students to utilise their personal educational experiences, the expertise of the faculty and business advisors, and support of SIFE donors to create educational outreach programmes that benefit the communities and enhance the personal growth of the members. The effectiveness of the educational outreach programmes was measured during the SIFE National Competition and SIFE World Cup which are held annually. Such exposure and network opportunity are extremely important to raise the leadership and communication skills and marketability potential of our students.

Health, Safety and Environment

Throughout the year in review, the University has made conscious and continuous efforts in strengthening its HSE practices. As a result, the University recently became the first university in Malaysia to receive the Malaysian Society for Occupational Safety & Health (MSOSH) Award 2007 under the Service Sector category. The award was presented by Datuk Thomas George, Chief Secretary of Ministry of Human Resources during the MSOSH Annual Dinner on 25 August 2008.

Corporate Social Responsibility

The University is mindful of its social obligation to prosper the economy and education of the surrounding community. Thus, in line with the University's academic philosophy of participating actively in consultancy work as well as assisting those in need, the Department of Computer and Information Sciences (CIS), in collaboration with KPerak Implementation and Coordination (INC) Corporation and Perak State Department of Education had conducted a 6-day training programme. The 'JAVA Training Programme For Anak Perak 2008' was held to train secondary school students from all over Perak, the latest technology in JAVA programming language. A total of 200 participants consisted of 160 students and 40 teachers have successfully completed the training, which was held from 12–17 June 2008.

The University was also proud to be associated with events organised by PETRONAS. More than 50 PETRONAS staff representing the various zones where PETRONAS operates namely PETRONAS Twin Towers, West Coast, East Coast, Sabah, Labuan and Sarawak participated in the 9th PETRONAS Tilawah Al-Quran Assembly held on 28–29 July 2008. Hosted for the first time by the University, the event witnessed the talents in the categories of Tilawah, Tilawah Murattal, Quranic Memorisation, Essay Writing and Quiz.

In complementing the nation's effort in celebrating Malaysian's local icons who excel in their respective fields and disciplines, the University is also especially proud to be associated with the prestigious Merdeka Award through the Merdeka Award Lecture Series. This lecture series aims to provide an opportunity and platform for the public, particularly students, to hear and be inspired by the recipients of the Merdeka Award as they talk about their work. Each lecture features the achievements of the recipients in light of its impact on the present and future generations. It also aims to inspire the younger generation to strive for excellence.

Challenges and Moving Forward

I take pleasure in outlining several key performance values that would certainly propel the University to greater heights:

- Quest for excellence – by all citizens of the University in all aspects of our endeavours;
- A sense of urgency – predominantly in the speed of each action taken in achieving organisational aspiration;
- A sense of ownership and belonging at all levels – to work as an organisation instead of in silos;
- Information sharing must be advocated;
- Continuous learning;
- Cost consciousness in operations, business, research and other endeavours;
- Warm hearts and cool heads – display more compassion and love in our profession and responsibilities.

Under this dynamic business environment, the University will pursue its journey to achieve its vision and mission with greater vigour, while building on its capabilities and strengths to face the challenges and to capitalise on the opportunities. To this end with the implementation of the Transformation Plan, the University will increasingly invest in the development of its technological capabilities and human resources while at the same time focus its efforts on sustaining a strong pervasive culture, driven by its shared values, corporate mission and values to sustain and enhance its competitive edge.

Appreciation

The University has delivered a good year and we owe our appreciation to all the individuals and organisations that continue to share our vision of growth.

On behalf of the Management and staff, I wish to record my heartfelt gratitude to our partners, associates and individuals whose expertise and resources have contributed tremendously to the successes we have had over the years. Our deepest appreciation is also extended to YBhg Datuk Dr Rosti Saruwono, former Vice President of Education PETRONAS; Tuan Haji Zainalabidin Ismail, former Secretary to the Board; and Tuan Haji Muhamad b Jurimi, former Director, Special Functions who had all retired this year. They were amongst the pioneers who had contributed significantly towards the establishment and development of the University and had shown tremendous dedication and commitment. I would also like to warmly welcome YBhg Puan Juniwati Rahmat Hussin, Vice President of Education PETRONAS and En Maliki Kamal Mohd Yasin, Legal Counsel and Secretary to the Board.
